Forecast for Tuesday 11 Jun 2024

Weather: Generally cloudy with a few light showers in the north, perhaps falling as sleet or even snow at first. Largely dry with prolonged clear spells in the south. Some cloudier conditions will develop during the morning, leading to showers quickly dying away. Isolated showers and mostly cloudy in the afternoon although some sunny spells will eventually develop from the north at the end of the day and clear spells becoming extensive during the evening.

Chance of cloud-free hill tops above 800m: 80% becoming 95% or more by mid-morning.

Low Cloud and visibility: Poor initially, with cloud as low as 600m and obscuring summits. Cloud lifting above summits by mid-morning, the visibility becoming very good all-around.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Unseasonably cold, especially at height when one consider the wind strength and low temperatures.

Forecast for Wednesday 12 Jun 2024

Weather: A better day with more sunshine and lighter winds. Generally dry and feeling warmer, particularly in sheltered areas.

Maximum wind: Westerly 10 mph with gusts 20 mph.

Chance of cloud-free hill tops above 800m: 95% or more.

Low Cloud and visibility: Very good all-around, with cloud probably clear of peaks throughout.

Temperature: **Valleys:** Plus 07 becoming 14 degrees Celsius.
At 800m: Plus 02 becoming 07 degrees Celsius.
Freezing level: Above summits.
